Introduction *Thanks for inviting me to be here*

~~I'm pleased to be here today~~ to welcome the new council for the next triennium, Congratulations to you all for being successful in your campaign to join the Greater

Wellington Regional Council. — *None of you are strangers to community service — + the same for those in great gallery —*

→ I have 2 relationships with you:

- ① as local member of Parlt ~~and~~ *and* facilitator of local govt + look after your bills.
- ② as Min. for Environ — our rel. is co-dependent →

2

Greater Wgh. has now given me a loss of sleep.

Your regional council has been proactive and very successful in protecting, preserving and enhancing Wellington's environment and in providing services for its residents.

3 areas I want to touch on.

Transport
Flood hazards.
Daily effluent.

Public transport in the region has come along in leaps and bounds.

The past three years has **seen -**

- **30** million passengers used Wellington's **public** transport services during **2002**,
- the **\$10.9** million Lambton **Bus** and Rail Interchange opened **in 2003**, and
- **this** year a new **network of bus** services have **been** introduced **in** the region.

In **May** this year the government **was** approached **by** Greater Wellington Regional Council to identify where central and local government partnership can further this good work. The Wellington, Transport Project was devised and action has started already.

5

Last month an assessment of Wellington's transport **needs** and potential funding sources were undertaken and a discussion paper asking for comments on Wellington's western corridor was realised earlier this month.

And I haven't forgotten the Hains ~~and~~ their upgrades —

6

This proactive approach to creating partnerships between Wellington's Regional and local councils and **the** government is something to **be** applauded and an approach that **I hope** encourages **us to** work together on **other important projects in the region.**

This working seamlessly is imp. for the community.

(last night in Hamilton — 10 councils working with LGRE / MFE / MED to find a way to handle efficiently Transport's new bus routes.)

7

With experts recently warning that “**El Nino's** back and we **should all** be worried”, **hazard** management is a **hot** topic. Greater Wellington Regional Council **already** knows **this and has** acted.

**Your Hutt River Floodplain _____ Plan is a
_____ council initiative to plan for the
development of the Hutt _____ catchment _____ out
flood control _____ and _____**

These systems were very much put to the test during the February floods of this year. They held up well. Flooding would have been more widespread and the damage far greater without this forward planning and the existing protection works established in part by the regional council.

Further good work continues with a 40-year investment programme for flood protection in the Hutt Valley beginning this year -- a programme that you will be progressing in your new role on the council.

Govt. is currently working with Regional Councils on a number of issues around flood management -- be it infrastructure / floodplain uses / insurance / maintenance.

From too much water to not enough, the Greater Wellington Regional Council has had an excellent record in providing water for its residents.

With rising population, pressure is on supply. However the council has been able to maintain a continuous supply of high quality drinking water for some years now.

Dairy

Ten years ago, **66** dairy farms in the Wairarapa had resource consent to discharge treated effluent into **watetways**. Greater Wellington Regional Council encouraged farmers to change to land-based waste-dumping systems as each consent came up for renewal.

13

In the late **1990s**, farmers and the council struck a deal to phase out **all** remaining consents. **As of** last month all **186** dairy farms in the Wairarapa are now spreading milking shed effluent back onto their paddocks. This is an excellent example of the regional council and dairy **farmers'** working **together** towards improving the environment.

14

**Non-point source discharges still remain a challenge,
something that now needs to be looked at to ensure
better stream health.**

In Dec. we will be releasing a discussion doc. on issues surrounding water quality & water allocation. We will have your input.

Community Ed

**The Greater Wellington Regional Council “Be the
Difference” campaign has been up and running for
nearly a year now.**

**Wellington’s residents said they wanted to do more to
help the environment but were limited by time and
needed more information on how to help. The “Be the
Difference” campaign aims to harness this interest by
encouraging households to improve the environment by
making small changes to their everyday behaviours.**

Members receive information packs three times a year, which provide simple and easy advice to residents. Over 7000 households have joined the programme so far, with the numbers increasing by the day.

17

Finally

The council provides valuable input into the Chief Executives' Environment Forum, which is jointly chaired by the Ministry for the Environment and the Hawkes Bay Regional Council.

18

The Chief Executives' Environment Forum is a meeting of regional authority and central government chief executives to discuss environmental issues of mutual concern and work towards joint programmes of action. Two highly successful meetings have been held so far with the third to be held early next year.

19

We look forward to continuing and expanding upon this sort of environmental partnership within your term in office.

20

11
—

[Conclusion)

The regional council has undertaken a wide variety of initiatives, which are having real results in the Wellington environment. I encourage you to take these **on and** help progress them further, as **well** as developing news ways of making Wellington a great place **to** live.

21

Once again, congratulations to you all. I wish you all the best and much success in your time on the council. I **look** forward to increasing partnership **and** input into **joint** work programmes with your council to work through the environmental challenges that Wellington **faces.**
